1. By third endorsement to the basic letter of reference (a), the Bureau requested the District Public Works Officer to prepare and submit for approval a draft of the proposed easement covering the right of way required by the Carolina Telephone and Telegraph Company.

2. In the course of preparing the above easement, it was determined that the acquisition documents pertaining to the subject railroad right of way were not available in this office. Accordingly, by reference (b), the Bureau was requested to forward copies of these documents. By reference (c), the Bureau advised that because of the expense involved in photostating these papers, they would not be furnished unless they were required for some pending legal or disposal action.

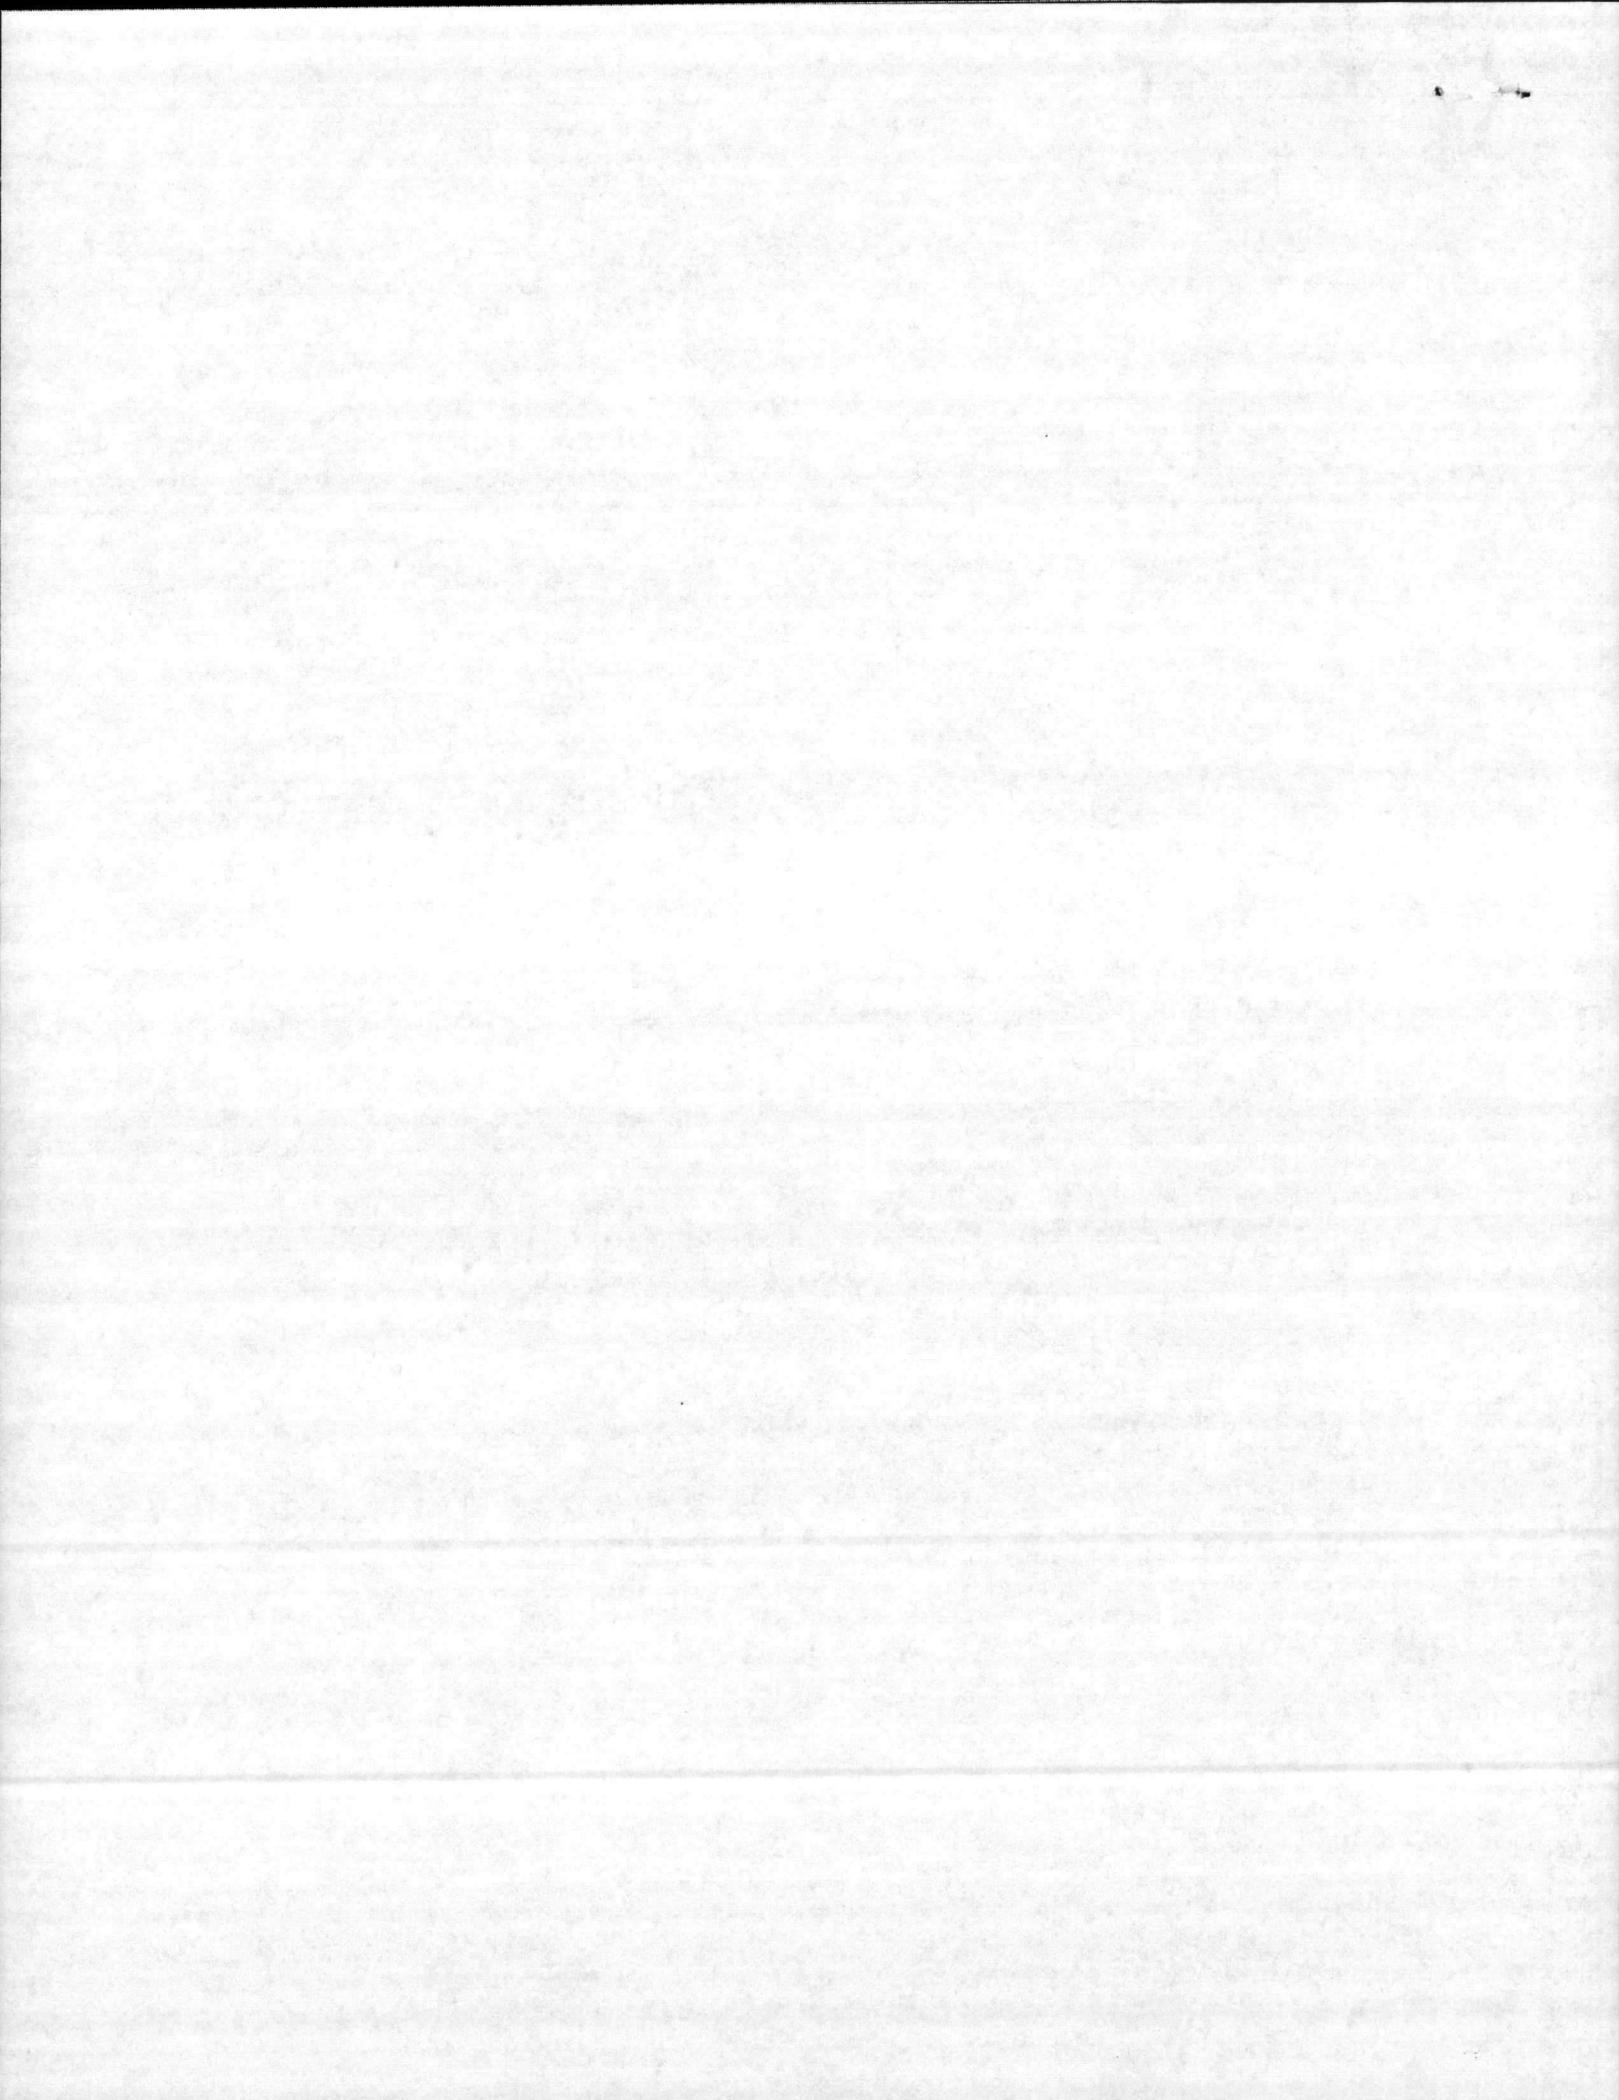

3. By reference (d), the Bureau was advised that the above documents were required in connection with processing an easement required by the Carolina Telephone and Telegraph Company, and by reference (e), this office was advised that they would be forwarded about 2 February 1959. Since this data has not been received as yet and since it is urgently required in processing the subject easement, it is requested that this matter be given prompt attention.
